

Sanovo Energy Assessment

You are probably aware that considerable amounts of energy can be saved at the plant you manage. You have considered insulating the naked pipes and replacing the old compressor. But where do you start? Where do you concentrate your effort and investment? And what are the actual potential savings?

Sanovo Energy Assessment helps you to identify the critical points and to quantify the savings through a thorough examination of the energy utilization in your production. Sounds expensive and risky? It is not! Sanovo Solutions offer Energy Assessment after the "NO CURE – NO PAY" principle. If no potential savings can be identified our services will be free of charges to you. We call this "NO CURE – NO PAY".

The Energy Assessment is carried out by our licensed energy assessment advisers appointed by The Danish Energy Authorities. They bring many years of experience in energy optimisation into your production – your guarantee for taking the right actions. Your potential savings are presented in detail in a report with suggestions for optimisation. Often the payback time of the suggested improvements is less than one year and, depending on your energy source, up to 40% may be saved!

Therefore you do not need to wait! Reduce your energy costs and discover suggestions to better solutions. The fee of the Energy Assessment balances the first years' net savings as identified in the report, however max. €35.000,-. If you choose to take action, you are not even obliged to pay us until the savings are achieved!* So Energy Assessment will not just add another load to your budget but ensure savings year after year.

Sanovo Solutions can furthermore take on project management of implementing the suggested solutions. The extent of the project management is agreed beforehand and charged €100,- per hour.

Inspection of boiler for Energy Assessment

Typical energy savings

A typical hot air pipe as it appears to you.

The same hot air pipe as we see it.
A lot of energy is lost here.
We tell you exactly how much
and what to do about it!

* Half the fee is due for payment within 14 days after delivery of report. The rest after demonstration of savings within a maximum of 6 months.
